PHP static code analysis

Unique rules to find Bugs, Vulnerabilities, Security Hotspots, and Code Smells in your PHP code

All rules 268 Vulnerability 40 Bug 51 Security Hotspot 33 Code Smell 144

Tags Search by name...

be used to end lines
Code Smell
More than one property should not be declared per statement
Code Smell
The "var" keyword should not be used
Code Smell
"<?php" and "<?=" tags should be used
Code Smell
File names should comply with a naming convention
Code Smell
Comments should not be located at the end of lines of code
Code Smell
Local variable and function parameter names should comply with a naming convention
Code Smell
Field names should comply with a naming convention
Code Smell
Lines should not end with trailing whitespaces
Code Smell
Files should contain an empty newline at the end
Code Smell
Modifiers should be declared in the correct order
Code Smell
An open curly brace should be located at the beginning of a line

More than one property should not be declared per statement Analyze your code

Code Smell Minor convention psr2

For better readability, do not put multiple property declarations in the same statement.

Noncompliant Code Example

```
<?php
class Foo
{
    private $bar = 1, $bar2 = 2;
}
```

Compliant Solution

```
<?php
class Foo
{
    private $bar1 = 1;
    private $bar2 = 2;
}
```
