be used to end lines
Code Smell
More than one property should not be declared per statement
Code Smell
The "var" keyword should not be used
Code Smell
"<?php" and "<?=" tags should be used
Code Smell
File names should comply with a naming convention
Code Smell
Comments should not be located at the end of lines of code
Code Smell
Local variable and function parameter names should comply with a naming convention
Code Smell
Field names should comply with a naming convention
Code Smell
Lines should not end with trailing whitespaces
Code Smell
Files should contain an empty newline at the end
Code Smell
Modifiers should be declared in the correct order
Code Smell
An open curly brace should be located at the beginning of a line

A close curly brace should be located at the beginning of a line

Analyze your code

Code Smell

Minor ?

convention

Shared coding conventions make it possible for a team to efficiently collaborate. This rule makes it mandatory to place a close curly brace at the beginning of a line.

Noncompliant Code Example

```
if(condition) {
    doSomething();
}
```

Compliant Solution

```
if(condition) {
    doSomething();
}
```

Exceptions

When blocks are inlined (open and close curly braces on the same line), no issue is triggered.

```
if(condition) {doSomething();}
```

Available In:

sonarlint | sonarcloud | sonarqube

 Code Smell

An open curly brace should be located at the end of a line

 Code Smell

Tabulation characters should not be used

 Code Smell

Method and function names should comply with a naming convention

 Code Smell

Creating cookies with broadly defined "domain" flags is security-sensitive
