Search by name... 

Two branches in a conditional structure should not have exactly the same implementation
 Code Smell
Unused assignments should be removed
 Code Smell
Method arguments with default values should be last
 Code Smell
A reason should be provided when skipping a test
 Code Smell
"__construct" functions should not make PHP 4-style calls to parent constructors
 Code Smell
PHP 4 constructor declarations should not be used
 Code Smell
Deprecated predefined variables should not be used
 Code Smell
"switch" statements should not have too many "case" clauses
 Code Smell
Classes should not have too many methods
 Code Smell
Functions should not have too many lines of code
 Code Smell
"for" loop stop conditions should be invariant

Assertions should not compare an object to itself

Analyze your code

 Bug

 Major 

 tests phpunit

Assertions comparing an object to itself are more likely to be bugs due to developer's carelessness.

This rule raises an issue when the actual expression matches the expected expression.

Noncompliant Code Example

```
assertEqual($a, $a); // Noncompliant
assertSame($a, $a); // Noncompliant
assertNotEqual($a, $a); // Noncompliant
assertNotSame($a, $a); // Noncompliant
```

Compliant Solution

```
assertEqual($expected, $a);
assertSame($expected, $a);
assertNotEqual($expected, $a);
assertNotSame($expected, $a);
```
