Modifiers should be declared in the correct order
 Code Smell
An open curly brace should be located at the beginning of a line

Files should contain an empty newline at the end

Analyze your code

 Code Smell

 Minor ?

 convention

Some tools work better when files end with an empty line.

This rule simply generates an issue if it is missing.

For example, a Git diff looks like this if the empty line is missing at the end of the file:

```
+class Test {  
+}  
\ No newline at end of file
```
