More than one property should not be declared per statement

Code Smell

The "var" keyword should not be used

Code Smell

"<?php" and "<?=" tags should be used

Code Smell

File names should comply with a naming convention

Code Smell

Comments should not be located at the end of lines of code

Code Smell

Local variable and function parameter names should comply with a naming convention

Code Smell

Field names should comply with a naming convention

Code Smell

Lines should not end with trailing whitespaces

Code Smell

Files should contain an empty newline at the end

Code Smell

Modifiers should be declared in the correct order

Code Smell

An open curly brace should be located at the beginning of a line

Redundant pairs of parentheses should be removed

Analyze your code

Code Smell Major ? confusing

The use of parentheses, even those not required to enforce a desired order of operations, can clarify the intent behind a piece of code. But redundant pairs of parentheses could be misleading, and should be removed.

Noncompliant Code Example

```
$x = ($y / 2 + 1); // Compliant even if the parenthesis

if ($a && (($x + $y > 0))) { // Noncompliant
    //...
}

return (($x + 1)); // Noncompliant
```

Compliant Solution

```
$x = ($y / 2 + 1);

if ($a && ($x + $y > 0)) {
    //...
}

return ($x + 1);
```
