Code Smell 144

Tags ▾

Search by name... 🔍

Code Smell

More than one property should not be declared per statement

Code Smell

The "var" keyword should not be used

Code Smell

"<?php" and "<?=" tags should be used

Code Smell

File names should comply with a naming convention

Code Smell

Comments should not be located at the end of lines of code

Code Smell

Local variable and function parameter names should comply with a naming convention

Code Smell

Field names should comply with a naming convention

Code Smell

Lines should not end with trailing whitespaces

Code Smell

Files should contain an empty newline at the end

Code Smell

Modifiers should be declared in the correct order

Code Smell

An open curly brace should be located at the beginning of a line

## Duplicate values should not be passed as arguments

Analyze your code

Code Smell

Major

?

There are valid cases for passing a variable multiple times into the same method call, but usually doing so is a mistake, and something else was intended for one of the arguments.

### Noncompliant Code Example

```
if (compare($a+$x, $a+$x) != 0) { // Noncompliant
    //...
}

if (compare(getValue($a), getValue($a)) != 0) { // Nonc
    // ...
}
```

### Compliant Solution

```
if (compare($a+$y, $a+$x) != 0) {
    //...
}

$v1 = getValue($a);
$v2 = getValue($a);
if (compare($v1, $v2) != 0) {
    // ...
}
```

### Deprecated

This rule is deprecated, and will eventually be removed.
